

Claim 20, line 1, change "polymer is" to -- polymer comprises--; and,

line 2, change "one fimbrolide compound in accordance with claim 18" to -- one of said fimbrolide compounds--;

line 3, change "monomers" to --monomer--;

Claim 22, lines 2 and 3, change "claims 1 to 5 or 17" to --claim 1-- and delete the remainder of the sentence;

Claim 23, lines 2 and 3, change "claims 1 to 5 or 17" --claim 1-- and delete the remainder of the sentence;

Claim 24, lines 1-3, after "compound" insert --in accordance with claim 1-- and delete the remainder of the sentence.

Please add new claims 27 - 49 as follows:

--27. A fimbrolide derivative produced by a method in accordance with claim 9.

28. A fimbrolide derivative produced by a method in accordance with claim 12.

29. A fimbrolide derivative produced by a method in accordance with claim 15.

30. A method of disinfection comprising the application of a compound in accordance

with claim 1 to any surface in an amount effective to act as an antimicrobial agent, an antiseptic, a microbial static agent, or an antifouling agent.

31. A method of disinfection comprising the application of a compound in accordance with claim 17 to any surface in an amount effective to act as an antimicrobial agent, an antiseptic, a microbial static agent, or an antifouling agent.

32. A method of disinfection comprising the application of a compound in accordance with claim 27 to any surface in an amount effective to act as an antimicrobial agent, an antiseptic, a microbial static agent, or an antifouling agent.

33. A method of disinfection comprising the application of a compound in accordance with claim 28 to any surface in an amount effective to act as an antimicrobial agent, an antiseptic, a microbial static agent, or an antifouling agent.

34. A method of disinfection comprising the application of a compound in accordance with claim 29 to any surface in an amount effective to act as an antimicrobial agent, an antiseptic, a microbial static agent, or an antifouling agent.

35. An antimicrobial, antiseptic and/or microbial static composition including at least one compound in accordance with claim 17.

36. An antimicrobial, antiseptic and/or microbial static composition including at least one oligomer or polymer in accordance with claim 18.

37. An antimicrobial, antiseptic and/or microbial static composition including at least one compound in accordance with claim 27.

38. An antimicrobial, antiseptic and/or microbial static composition including at least one compound in accordance with claim 28.

39. An antimicrobial, antiseptic and/or microbial static composition including at least one compound in accordance with claim 29.

40. An antifouling composition including at least one compound in accordance with claim 17.

41. An antifouling composition including at least one oligomer or polymer in accordance with claim 18.

42. An antifouling composition including at least one compound in accordance with claim 27.

43. An antifouling composition including at least one compound in accordance with claim 28.

44. An antifouling composition including at least one compound in accordance with claim 29.

45. A surface coating composition incorporating at least one compound in accordance with claim 17.

46. A surface coating composition incorporating at least one oligomer or polymer in accordance with claim 18.

47. A surface coating composition incorporating at least one compound in accordance with claim 27.

48. A surface coating composition incorporating at least one compound in accordance with claim 28.

49. A surface coating composition incorporating at least one compound in accordance with claim 29.--
